Previous Careers:

Engineering and Project Delivery:

Multi-Billion Dollar Projects • Interacting with Primary Stakeholders

Project Planning and Delivery • Third Party Interface and Management

School Teacher:

Communication of Technical Information • Responsibility and Accountability

About me:

After a successful career in delivery of large scale infrastructure engineering projects, I have retrained in web development. I am in search of work place culture that is more flexible, dynamic and compatible with innovation. I have developed strong technical skills throughout my employment and education combined with excellent communication skills in French, English and German.

For example projects, visit my github
